SwiftCart Online Retail Analysis

Key EDA findings and practical decisions for customers, products, sales, orders, channels, time patterns, and geography.

Overview

The SwiftCart analysis highlights where recorded sales value is concentrated and which areas may need attention. The recommendations below translate the observed patterns into practical actions the business can test and monitor.

1. Customer Insights

Finding

Women account for 20,813 records (67.04%), while men account for 9,159 (29.50%). Adult customers contribute the highest recorded amount, around ₹1.06 crore. The average recorded amount for men is ₹800.75, compared with ₹628.31 for women.

Business decision

Continue promoting suitable products to women and adult customers. Test premium-product offers for men and compare the results to see whether they lead to higher sales.

2. Product Insights

Finding

Sets contribute the highest recorded amount at approximately ₹1.05 crore, followed by Kurtas at ₹49.59 lakh and Western Dresses at ₹31.49 lakh. Bottom contributes ₹27,804 and has the highest category-level cancellation rate (6.41%) and return rate (7.69%).

Business decision

Give priority to keeping Sets and Kurtas in stock. For Bottom, review sizing information, product descriptions, and customer feedback to understand why customers cancel or return these products. Test targeted offers before investing in additional stock.

3. Sales Insights

Finding

The dataset contains 31,047 records with a total recorded amount of approximately ₹2.12 crore. The average recorded amount is ₹682.07, while the median is ₹646. A small number of high-value records contribute to the right-skewed amount distribution.

Business decision

Test product bundles and add-on offers based on common customer spending ranges. Compare results before and after the offers to see whether customers spend more per transaction.

4. Order Insights

Finding

There are 28,641 delivered records, 1,045 returned records, 844 cancelled records, and 517 refunded records. Bottom has the highest cancellation and return rates, while Western Dress has the highest refund rate at 3.05%.

Business decision

Focus first on reducing returns for Bottom and investigate refunds for Western Dress. Review customer feedback and the reasons behind cancellations, returns, and refunds before deciding which changes are needed.

5. Channel Insights

Finding

Amazon leads with 11,016 records and a recorded amount of ₹75.20 lakh. Myntra follows with ₹49.42 lakh, and Flipkart with ₹45.73 lakh. Amazon also has the highest number of returned records (371) and cancelled records (299).

Business decision

Maintain product availability and strong listings on Amazon, Myntra, and Flipkart. Investigate Amazon's returns and cancellations, and compare channel performance before deciding where to spend more on promotions.

6. Time Pattern Insights

Finding

March has the highest monthly recorded amount at ₹19.09 lakh, while November has the lowest at ₹15.92 lakh. December has 124 returned records, while November has the highest cancellation count at 80.

Business decision

Plan targeted promotions for November and study which products or campaigns performed well in March. Investigate December's returns and track monthly return and cancellation rates to identify where improvements are needed.

7. Geographic Distribution Insights

Finding

Maharashtra has the highest recorded amount at ₹29.90 lakh, followed by Karnataka at ₹26.46 lakh and Uttar Pradesh at ₹21.05 lakh. Among the ten states examined, Uttar Pradesh has the highest average recorded amount at ₹730.28. Bengaluru and Hyderabad have the highest city-level record counts.

Business decision

Prioritize stock availability and regional marketing in Maharashtra and Karnataka. Test targeted offers in Uttar Pradesh and run local campaigns in Bengaluru and Hyderabad to identify further growth opportunities.

Overall Business Recommendations

Area	Recommended action
Inventory	Keep Sets and Kurtas well stocked, guided by category and size demand.
Returns	Investigate high return rates for Bottom and Western Dress and address confirmed causes.
Marketing	Continue reaching women and adult customers while testing premium offers for men.
Sales channels	Maintain strong listings on major channels and investigate Amazon's returns and cancellations.
Seasonal sales	Plan targeted campaigns for weaker months, especially November.
Regional growth	Prioritize Maharashtra and Karnataka, and test campaigns in Uttar Pradesh and major cities.

Conclusion

The analysis shows that Sets and Kurtas are SwiftCart's leading product categories, Amazon is the strongest channel by recorded amount, and Maharashtra and Karnataka are important markets. SwiftCart can build on these strengths while investigating returns and cancellations to make better decisions about stock, promotions, customer experience, and regional marketing.

Data note: Amounts represent recorded transaction amounts, not verified profit. Dataset records may represent individual line items rather than unique orders.
